

6G Two Way Rocker Switch - Polished Nickel White

17304

This six-gang, two-way rocker switch in our polished nickel finish sits flush to the wall. The front plate is also just 1.5mm thick.

The plate and rockers are all made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rockers comes in white (like this one) or black.

Use a two-way rocker switch where you want to simply turn a lighting circuit on and off. You can have up to two separate switches around the room to control one circuit. For three or more, add an intermediate switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Engineered for a satisfying click
- Match with lighting and hardware in our polished nickel finish
- You'll need to use our [metal or recycled plastic 2x double portrait back box](#) with this switch
- Dimensions: H166mm x W146mm x D32mm.
