

1G Two Way Dimmer Slimline Switch - Clear Polished Nickel

14515

Our range of slimline switches have narrow 70mm wide faceplates for a sleek look and feel.

They're perfect for smaller spaces like cloakrooms or coat cupboards, or anywhere you'd like your fittings to be slightly more discreet.

Powered by the latest technology, the rotary style dimmer switch lets you set the mood from morning to night.

The clear plate is made from 2mm transparent polycarbonate, which gives the illusion of the outlet being built into the wall.

It comes with a paper template for you to either paint over with your chosen wall colour, or to use as a template for wallpaper.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Solid brass controls
- Anti-flickering/buzzing
- Suitable for trailing or leading edge modes
- Comes with bespoke back box for easy installation
- Match with [spotlights](#), [door handles](#) and more from the polished nickel collection
