

1G Two Way Toggle + USB A+C Slimline Switch - Clear Antique Brass Black

17209

Our range of slimline switches have narrow 70mm wide faceplates for a sleek look and feel.

This toggle switch is a modernised version of the timeless dolly design that'll add character to any room. The USB charging point makes this perfect switch for your bedside or kitchen counters.

The clear plate is made from 2mm transparent polycarbonate, which gives the illusion of the outlet being built into the wall.

It comes with a paper template for you to either paint over with your chosen wall colour, or to use as a template for wallpaper.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented switch mechanism engineered to give a solid, satisfying click
- Tested to one million cycles to guarantee longevity
