

1G Double Pole Rocker Switch - Clear Polished Nickel Black

17604

This one-gang, double-pole rocker switch in polished nickel is a more modern alternative to our toggle switches.

The clear plate is made from slim polycarbonate. It comes with a paper template that you can either paint over or use to cut out wallpaper, which blends the switch into the wall.

The rocker switch itself is made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rocker comes in black (like this one) or white.

Use a double-pole switch to turn appliances on and off. It interrupts both the live and neutral wires, which basically just means it's a safer version of a two-way switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Engineered for a satisfying click
- Use with our metal or recycled plastic back boxes
- Match with lighting and hardware in our polished nickel finish
- Dimensions: H86mm x W86mm x D32mm.
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- The switch plate sits 1.5mm from the wall
- Metal die-cast Chassis
- Deep backbox must be used
