

1G Retractive Rocker Switch - Clear Bronze Black

10832

This one-gang retractive rocker switch in Bronze is a more modern alternative to our toggle switches.

The clear plate is made from slim polycarbonate. It comes with a paper template that you can either paint over or use to cut out wallpaper, which blends the switch into the wall.

The rocker switch itself is made from solid brass to create perfectly crisp edges.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells or in-sink food waste grinders. Or, use it with an in-line dimmer module to dim lights. Press and hold to dim up. Then press and hold again to dim down.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Use with our metal or recycled plastic back boxes
- Match with lighting and hardware in our Bronze finish
- Dimensions: H86mm x W86mm x D32mm.
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- The switch plate sits 1.5mm from the wall
- Metal die-cast Chassis
- Deep backbox must be used
- In line dimmer must be located remotely
