

1G Double Pole Toggle Switch - Clear Polished Nickel

12830

A Double Pole Switch gives an extra level of safety by interrupting both the live and neutral wires. They're often used to control appliances in kitchens.

This toggle switch is a modernised version of the timeless dolly design that'll add character to any room.

The clear plate is made from 2mm transparent polycarbonate, which gives the illusion of the outlet being built into the wall.

It comes with a paper template for you to either paint over with your chosen wall colour, or to use as a template for wallpaper.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented switch mechanism engineered to give a solid, satisfying click
- Tested to one million cycles to guarantee longevity
- Solid brass controls
- Screwless design
- Match with [spotlights](#), [door handles](#) and more from the polished nickel collection.
