

2G Mixed Switch 1T1D - Clear Polished Nickel

11640

Use a standard toggle switch and a dimmer knob on one plate with our mixed switch design.

Powered by the latest dimmer technology, the smooth rotary style control lets you set the mood from morning to night.

The clear plate is made from 2mm transparent polycarbonate, which gives the illusion of the outlet being built into the wall.

It comes with a paper template for you to either paint over with your chosen wall colour, or to use as a template for wallpaper.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented switch mechanism engineered to give a solid, satisfying click
- Tested to one million cycles to guarantee longevity
- Anti-flickering/buzzing
- Suitable for trailing or leading edge modes
- Solid brass controls
- Match with [spotlights](#), [door handles](#) and more from the polished nickel collection
- We recommend using a [35-47mm back box](#) with this switch
- Dimensions: H86mm x W86mm x D42mm. The toggle length is 17mm.
- Switches rated to 20A
- The switch plate sits 1.5mm from the wall
- Secured with a metal ring without visible tool marks
- Metal die-cast chassis
- All dimmers have built in thermal and short circuit protection
- Minimum brightness can be set, which avoids any bulb flicker
- Trailing or leading edge dimming control .Trailing edge is the default setting and is recommended to prolong LED life
- Soft start operation which protects the bulbs
- Two dimmers cannot be combined to control the same light. Use toggle switches in combination with a dimmer switch
- Complies with BS EN 60669-1
- 230-250V~50Hz
- 5-150W LED's 10-350W incandescent bulbs
