

Digby Long Plate Fixed Door Handle - Bronze

19205

The detailing on our Digby door handle makes it one of our more traditional styles, but its simplicity will work in modern spaces too.

This version includes a low-profile, long backplate for a bold look.

The handle comes with a fixed spindle that's normally used on double doors to give a solid fix to the handle on the inactive door. You can push or pull it, but it won't turn.

There's also no danger of it coming away – the spindle is threaded onto the handle which holds it in place.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Solid brass 4mm backplate with screwless 'front' side
- Sold in a pair
- Must be installed using our [12mm template profiler router bit](#) and [flat plate routing jig](#)
