

Harper T-Bar Long Plate Sprung Door Handle - Antique Brass

10935

Our solid brass Harper T-bar door handle is a sleek, architectural alternative to a door knob, inspired by Belgian hardware.

It's a versatile design but will especially suit more minimal interiors; particularly with the low-profile, long backplate.

This version of the Harper T-bar is sprung, which means you don't need to rely on the latch's spring for the handle's movement.

There's also no danger of the handle coming away in your hand – the spindle is threaded onto the handle which holds it in place.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Solid brass 4mm backplate with screwless 'front' side
- Super smooth turn thanks to self-lubricating, high-tolerance bushings
- Longer handle neck for a comfortable grip (compared to rose variant)
- Sold in a pair
- Must be installed using our [12mm template profiler router bit](#) and [flat plate routing jig](#)
- Dimensions: handle W82mm x D60mm; plate H210mm x W40mm x D4mm
- Designed for use with a tubular latch or mortice lock
- Supplied with Corston sprung mechanism
- Suitable for interior doors only
- Minimum door thickness 35mm; maximum door thickness 45mm (with supplied fixings)
- Accepts 8mm Corston spindle (supplied)
