

Dummy Dimmer Switch - Clear Polished Nickel

16019

This Clear polished nickel dummy dimmer switch can be combined with our two way dimmers to control the same light from two locations.

This switch allows you to keep the dimmer visual throughout the house, but you will not be able to dim with this module.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- This switch is for clear plates.
- The switch cannot dim the lights.
