

1G Rocker Switch Plate - Antique Brass

11831

Using our switch components, you can create any combination of plate and switch that you need.

This 1G plate works with any of our rocker switches in the Antique Brass finish.

It's made from solid brass to create perfectly crisp edges and the 1.5mm flush-fit profile.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Use with our metal or recycled plastic back boxes
- Match with lighting and hardware in our Antique Brass finish
