

Double Pole Rocker Switch - Polished Nickel Black

14196

Using our switch components, you can create any combination of plate and switch that you need.

This polished nickel-finished double-pole rocker switch is made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rocker comes in black (like this one) or white.

Use a double-pole switch to turn appliances on and off. It interrupts both the live and neutral wires, which basically just means it's a safer version of a two-way switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Engineered for a satisfying click
- Works with either our solid brass switch plates in the polished nickel finish or our Clear Black plates
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
