

## Intermediate Rocker Switch - Polished Nickel Black

17017

Using our switch components, you can create any combination of plate and switch that you need.

This polished nickel-finished intermediate rocker switch is made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rocker comes in black (like this one) or white.

Use an intermediate switch together with two-way switches on a lighting circuit that you control from three or more places.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Engineered for a satisfying click
- Works with either our solid brass switch plates in the polished nickel finish or our Clear Black plates
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
