

Retractive Rocker Switch - Antique Brass White

12170

Using our switch components, you can create any combination of plate and switch that you need.

This Antique Brass-finished retractive rocker switch is made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rocker comes in white (like this one) or black.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Works with either our solid brass switch plates in the Antique Brass finish or our Clear White plates
- In-line dimmer module needed to dim lights
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- In line dimmer must be located remotely
