

Centre Retractive Rocker Switch - Bronze Black

19564

Using our switch components, you can create any combination of plate and switch that you need.

This Bronze-finished centre-retractive rocker switch is made from solid brass to create perfectly crisp edges.

A centre-retractive switch flicks back to the centre 'off' position when you let go. You can use it for things like electronic blinds and to dim lights.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Works with either our solid brass switch plates in the Bronze finish or our Clear Black plates
- In-line dimmer module needed to dim lights
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- In line dimmer must be located remotely
