

Retractive Rocker Switch - Bronze Black

13028

Using our switch components, you can create any combination of plate and switch that you need.

This Bronze-finished retractive rocker switch is made from solid brass to create perfectly crisp edges.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Works with either our solid brass switch plates in the Bronze finish or our Clear Black plates
- In-line dimmer module needed to dim lights
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- In line dimmer must be located remotely
