

Retractive Rocker Switch - Polished Nickel Black

13340

Using our switch components, you can create any combination of plate and switch that you need.

This polished nickel-finished retractive rocker switch is made from solid brass to create perfectly crisp edges.

The small amount of plastic around the rocker comes in black (like this one) or white.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Works with either our solid brass switch plates in the polished nickel finish or our Clear Black plates
- In-line dimmer module needed to dim lights
- Switches Rated to 16A
- 230-250V ~ 50Hz
- Complies with BS EN 60669-1
- In line dimmer must be located remotely
