

Triple 3x Vertical Toggle Switch - Paintable Antique Brass

30682

We've engineered this triple 3x vertical toggle switch to be as sleek as possible.

The front plate is just 1.5mm thick and sits flush to the wall. It attaches to the back plate using clips for a screwless look. We've finished it with etch primer that can be coated in the same paint as your walls for a seamless look that blends right in.

Use a two-way switch where you want to simply turn a circuit on and off. You can have up to two of these on one circuit. To control the circuit from three or more places, add an intermediate switch.

The subtle solid brass switch detailing is finished in antique brass. Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Made from solid brass
- Etch primer allows paint to adhere well for a seamless custom finish
- Screwless design
- Streamlined toggle with a satisfying click
- Must be installed with our [triple back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- Dimensions: H222mm x W80mm x D23mm; toggle length 15mm
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 1.5mm from the wall
- Metal die-cast chassis
- Finished in etch primer
