

## Single Rocker Switch (Cent) - Paintable Antique Brass Black

32812

We've engineered this single rocker switch to be as sleek as possible.

The front plate is just 1.5mm thick and sits flush to the wall. It attaches to the back plate using clips for a screwless look. We've finished it with etch primer that can be coated in the same paint as your walls for a seamless look that blends right in.

A centre-retractive switch flicks back to the centre 'off' position when you let go. You can use it for things like electronic blinds and, together with an in-line dimmer module, to dim lights.

The subtle solid brass switch detailing is finished in antique brass. Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

The small amount of low-sheen plastic around the rocker comes in black (like this one) or white.

- Patented electrical system engineered to make our signature flush-fit design possible
- Made from solid brass
- Etch primer allows paint to adhere well for a seamless custom finish
- Screwless design
- Engineered for a satisfying click
- Must be installed with our [single back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- Dimensions: H80mm x W80mm x D32mm. The rocker sits 6mm from the plate
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 1.5mm from the wall
- Metal die-cast chassis
- Finished in etch primer
