

Triple Toggle Switch + 2x Swiss Type J Power Module Round - Paintable Polished Nickel Black

32622

We've engineered this triple toggle switch and 2x Swiss socket to be as sleek as possible. It's a great option for your bedside or kitchen.

The front plate is just 1.5mm thick and sits flush to the wall. It attaches to the back plate using clips for a screwless look. We've finished it with etch primer that can be coated in the same paint as your walls for a seamless look that blends right in.

Use a two-way switch where you want to simply turn a circuit on and off. You can have up to two of these on one circuit. To control the circuit from three or more places, add an intermediate switch.

The subtle solid brass switch detailing is finished in polished nickel. Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

The low-sheen, slightly textured plastic inserts around the sockets come in black (like this one) or white.

- Patented electrical system engineered to make our signature flush-fit design possible
- Made from solid brass
- Etch primer allows paint to adhere well for a seamless custom finish
- Screwless design
- Streamlined toggle with a satisfying click
- Must be installed with our [triple back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- Dimensions: H80mm x W222mm x D34mm; toggle length 15mm
- Switches rated to 16A; sockets rated to 10A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 1.5mm from the wall
