

Double Two Way Rocker Switch EU - Polished Nickel White

30515

Using our switch components, you can create any combination of plate and switch that you want.

We've made this double two-way rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges, and finished it in polished nickel.

Use a two-way rocker switch where you want to simply turn a lighting circuit on and off. You can have up to two of these switches on one circuit. For three or more, add an intermediate switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented electrical system engineered to make our signature flush-fit design possible
- Engineered for a satisfying click
- Must be used with our plates and back boxes
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
