

Triple 3x Vertical Dimmer Switch - Clear Antique Brass

31503

This triple 3x vertical dimmer switch is just 2mm thick and has a screwless face, so it really is pretty invisible on the wall.

We make our clear collection from polycarbonate which is more flexible and durable than the usual acrylic.

There's also a collar underneath each rotating knob to hide all the working parts.

The knobs and collars are made from solid brass (rather than plastic wrapped in metal) to create perfectly crisp edges. We then hand-age them for an antique look.

Used with a suitable bulb, our dimmers won't flicker or buzz, and you can set the minimum bulb brightness.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Works with paint or wallpaper
- Suitable for trailing or leading edge modes
- Must be installed with our [triple back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- H222mm x W80mm x D23mm
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 2mm from the wall
- Secured with a metal ring without visible tool marks
