

Two Way Rocker Switch EU - Antique Brass Black

31945

Using our switch components, you can create any combination of plate and switch that you need.

We've made this two-way rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges. We then hand-age it for an antique look.

Use a two-way rocker switch where you want to simply turn a lighting circuit on and off. You can have up to two of these switches on one circuit. For three or more, add an intermediate switch.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Engineered for a satisfying click
- Must be used with our plates and back boxes
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
