

Single Rocker Switch - Clear Polished Nickel White

32565

This single rocker switch is only 2mm thick, so it really is pretty invisible on the wall.

We make our clear collection from polycarbonate which is more flexible and durable than the usual acrylic.

The rocker is made from solid brass (rather than plastic wrapped in metal) to create perfectly crisp edges, and finished in polished nickel.

Use a two-way switch where you want to simply turn a circuit on and off. You can have up to two of these on one circuit. To control the circuit from three or more places, add an intermediate switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented electrical system engineered to make our signature flush-fit design possible
- Works with paint or wallpaper
- Engineered for a satisfying click
- Must be installed with our [single back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- H80mm x W80mm x D23mm
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 2mm from the wall
- Secured with a metal ring without visible tool marks
