

## Double 45mm Switch Plate EU - Bronze

32831

Using our components, you can create any combination of switches or sockets that you need.

This double 45mm plate in bronze works with any of our rocker switches or our 45mm socket modules (just make sure you choose the ones made with black plastic).

We make it from solid brass, rather than plastic wrapped in metal, to get really crisp edges and an ultra-slim profile (1.5mm) that sits flush to the wall.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Patented electrical system engineered to make our signature flush-fit design possible
- Can be fitted horizontally or vertically
- Screwless face
- Must be installed with our double back box
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
