

Centre Retractive Rocker Switch EU - Polished Nickel White

34055

Using our switch components, you can create any combination of plate and switch that you want.

We've made this centre-retractive rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges, and finished it in polished nickel.

A centre-retractive switch flicks back to the centre 'off' position when you let go. You can use it for things like electronic blinds and to dim lights (with either a remote dimmer or our in-line unit).

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented electrical system engineered to make our signature flush-fit design possible
- Must be used with our plates and [back boxes](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
