

Double 2x Vertical Toggle Switch - Antique Brass

34279

We've engineered this double 2x vertical toggle switch to be as sleek as possible.

The antique brass-finished front plate is just 1.5mm thick and sits flush to the wall. It attaches to the back plate using clips for a screwless look.

Use a two-way switch where you want to simply turn a circuit on and off. You can have up to two of these on one circuit. To control the circuit from three or more places, add an intermediate switch.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Made from solid brass
- Streamlined toggle with a satisfying click
- Must be installed with our [double back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- Dimensions: H151mm x W80mm x D23mm. The toggle length is 15mm.
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 1.5mm from the wall
- Secured with a metal ring without visible tool marks
