

Single Blank Plate - Bronze

34627

You can use a blank plate to cover a switch or socket that's you're not using to make it safe and to protect it from dust and moisture.

They're handy if you don't want to or can't plaster over the unused outlet.

Like all our switches and sockets, we've engineered this single blank plate to be as sleek as possible. The bronze-finished front plate is just 1.5mm thick and sits flush to the wall. It attaches to the back plate using clips for a screwless look.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Patented electrical system engineered to make our signature flush-fit design possible
- Made from solid brass
- Coordinates with our hardware and lighting
- Must be installed with our [single back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- H80mm x W222mm x D46mm
- The plate sits 1.5mm from the wall
- Secured with spring clips to allow for a screw-less finish
- Metal die-cast chassis
- Sockets rated to 16A
- 230-250V~50Hz
