

Triple 3x Keystone Switch Plate EU - Bronze

34653

Using our components, you can create any combination of sockets that you need.

This bronze plate works with any three of our black 20mm keystone modules.

We make it from solid brass, rather than plastic wrapped in metal, to get really crisp edges and an ultra-slim profile (1.5mm) that sits flush to the wall.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

- Patented electrical system engineered to make our signature flush-fit design possible
- Can be fitted horizontally or vertically
- Screwless face
- Must be installed with our [triple back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
