

Retractive Rocker Switch EU - Polished Nickel White

35443

Using our switch components, you can create any combination of plate and switch that you want.

We've made this retractive rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges, and finished it in polished nickel.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights (with either a remote dimmer or our in-line unit).

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes.

- Patented electrical system engineered to make our signature flush-fit design possible
- Must be used with our plates and [back boxes](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
