

Single Rocker Switch - Clear Antique Brass Black

35997

This single rocker switch is just 2mm thick, so it really is pretty invisible on the wall.

We make our clear collection from polycarbonate which is more flexible and durable than the usual acrylic.

The rocker is made from solid brass (rather than plastic wrapped in metal) to create perfectly crisp edges. We then hand-age it for an antique look.

Use a two-way switch where you want to simply turn a circuit on and off. You can have up to two of these on one circuit. To control the circuit from three or more places, add an intermediate switch.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Works with paint or wallpaper
- Engineered for a satisfying click
- Must be installed with our [single back box](#)
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
- H80mm x W80mm x D23mm
- Switches rated to 16A
- 230-250V~50Hz
- Complies with IEC 60669-1
- The switch plate sits 2mm from the wall
- Secured with a metal ring without visible tool marks
