

Centre Retractive Rocker Switch EU - Antique Brass White

39747

Using our switch components, you can create any combination of plate and switch that you want.

We've made this centre-retractive rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges. We then hand-age it for an antique look.

A centre-retractive switch flicks back to the centre 'off' position when you let go. You can use it for things like electronic blinds and to dim lights (with either a remote dimmer or our in-line unit).

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Patented electrical system engineered to make our signature flush-fit design possible
- Must be used with our plates and back boxes
- You'll also need our 9mm render trim for brick walls or 3mm plaster trim for skimmed plasterboard
- Use our precisely sized brick or plasterboard hole saw for easy installation
