Grove 4G Switch Plate US

Paintable 52042

The switches and outlets in our Grove collection can be installed with existing electrical boxes, so they're ideal for retrofitting.

They offer a refined but bold look that'll make more of a statement on your walls. The front plates are precisely machined for crisp, clean edges and they're screwless (they simply clip in place).

Using our components, you can create any combination of switches you need.

This Grove paintable 4 gang switch plate works with any four of our toggle or rotary dimmer switches.

We prepare our paintable plates using our own self-etching primer, so you can easily paint them the same color as your walls.

- Made from solid brass
- Self-etching primer allows paint to adhere well for a seamless custom finish
- Screwless design and easy clip-on installation
- Ideal for renovation projects where an electrical box is already installed
- Compatible with 4G old work and new work boxes
