ARCHITECTURAL DETAIL

Four Way Rocker Switch

Antique Brass White 54373

Using our components, you can create any combination of switches you need.

This antique brass four-way rocker switch works with our Kew and Grove switch plates.

Use it together with three-way switches on a lighting circuit that you control from three or more places.

The small amount of low-sheen plastic around the rocker comes in white.

Antique brass is what's called a "living" finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by aging it by hand, so it has that antique look right out the box.

- Switch made from solid brass
- Mechanism engineered to give a solid, satisfying click
- Compatible with Kew and Grove switch plates
- Must be used with our antique brass-finished (or clear or paintable) plates

Input rating: **15A 125V~**

Frequency: **60Hz**

Testing standard: **ETL listed**

Terminal details: **Four terminals**
