
Triple 3x Keystone Switch Plate EU

Polished Nickel 31643

Using our components, you can create any combination of sockets that you need.

This polished nickel plate works with any three of our 20mm keystone modules.

We make it from solid brass, rather than plastic wrapped in metal, to get really crisp edges and an ultra-slim profile (1.5mm) that sits flush to the wall.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes. Polished nickel doesn't age, and all you need is a lint-free cloth to bring back its shine.

- Can be fitted horizontally or vertically
- Screwless face
