ARCHITECTURAL DETAIL

## Triple 45mm Switch Plate EU

Polished Nickel 33257

Using our components, you can create any combination of switches or sockets that you need.

This triple 45mm plate in polished nickel works with any of our rocker switches or our 45mm socket modules.

We make it from solid brass, rather than plastic wrapped in metal, to get really crisp edges and an ultra-slim profile (1.5mm) that sits flush to the wall.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes. Polished nickel doesn't age, and all you need is a lint-free cloth to bring back its shine.

- Can be fitted horizontally or vertically
- Screwless face
