ARCHITECTURAL DETAIL

Retractive Rocker Switch EU

Bronze Black 33499

Using our switch components, you can create any combination of plate and switch that you need.

We've made this retractive rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges, and finished it in Bronze.

A retractive switch flicks back into the top 'off' position when you let go. You can use it for things like doorbells, in-sink food waste grinders and to dim lights (with either a remote dimmer or our in-line unit).

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.

 Works with either our solid brass switch plates in the Bronze finish or our clear plates
