

CORSTON

ARCHITECTURAL DETAIL

Triple Plaster Trim

3mm 35661

Add this trim to your triple Corston back box so you can plaster it into the wall. It's the best way to get a perfect finish and the switch or socket plate sitting exactly flush.

It raises the box 3mm away from the wall for skimming (use our 9mm trim for thicker rendering).

- Made from recycled and recyclable post-consumer plastic
- Fire retardant
