Double 2x Switch Plate EU

Antique Brass 37152

Using our components, you can create any combination of switches that you need.

This double 2x switch plate works with any two of our Antique Brass rotary dimmer switches or toggle switches.

We make it from solid brass, rather than plastic wrapped in metal, to get really crisp edges and an ultra-slim profile (1.5mm) that sits flush to the wall.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

- Can be fitted horizontally or vertically
- Screwless face
