ARCHITECTURAL DETAIL

Two Way Rocker Switch EU

Polished Nickel White 38316

Using our switch components, you can create any combination of plate and switch that you want.

We've made this two-way rocker switch from solid brass, rather than metal-wrapped plastic, for perfectly crisp edges, and finished it in polished nickel.

Use a two-way rocker switch where you want to simply turn a lighting circuit on and off. You can have up to two of these switches on one circuit. For three or more, add an intermediate switch.

Polished nickel is our answer to chrome. It's a bit warmer, which we think is more versatile, so you can use it with warm or cool colour palettes. Polished nickel doesn't age, and all you need is a lint-free cloth to bring back its shine.

- Engineered for a satisfying click
- Works with either our solid brass switch plates in the polished nickel finish or our clear plates
