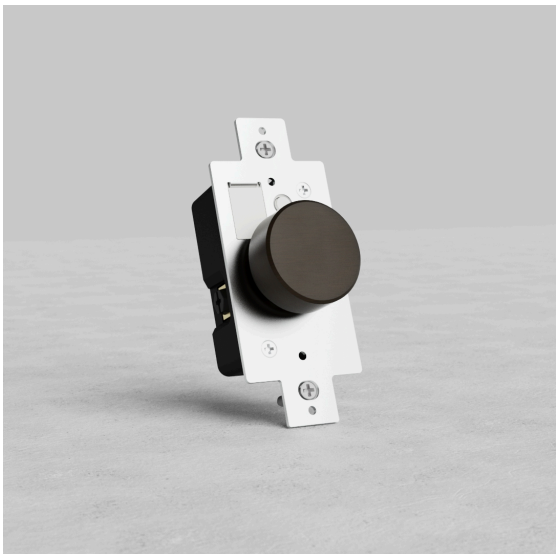
ARCHITECTURAL DETAIL



Dimmer Switch

Bronze 50037

Using our components, you can create any combination of switches you need.

This bronze rotary dimmer switch works with our Kew and Grove switch plates. It has a collar underneath the rotating knob that hides all the working parts.

Our dimmers also won't flicker or buzz when you use them with a suitable bulb, and you can set the minimum bulb brightness.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matte brown color that's almost black in some lights.

- Switch and collar made from solid brass
- Push to turn the light on/off and rotate to adjust brightness
- Suitable for leading edge mode only
- Compatible with Kew and Grove switch plates
- Must be used with our bronze-finished (or clear or paintable) plates

Input rating: **15A 125V~**

Frequency: **60Hz**

Testing standard: **ETL listed**

Maximum halogen wattage: **600W INC/HAL**

Maximum LED wattage: **150W CFL/LED**
