45W Fast Charge Keystone Module

White 53535

Using our components, you can create any combination of outlets you need.

This 45W USB-C module works with most of our Kew and Grove keystone plates (just not the 1G 2x and 3x plates, as our USB modules are bigger than our other keystone modules and they won't fit next to each other on these plates).

Use it to fast charge up to two USB-C devices.

- Compatible with Kew and Grove keystone plates
- Made from low-sheen white plastic with a slightly textured finish

Input rating: **15A 125V~**

Outlet type: **Keystone insert**

Maximum output: **Up to 45W fast charge**
