Poplar Long Plate Sprung Door Knob & Thumbturn

Antique Brass 15989

Our Poplar design is our take on the classic Victorian beehive knob.

We've streamlined things, giving it a flatter knob and, in this case, a low-profile, long backplate and built-in thumbturn. It'll work well in period properties with a contemporary edge, or by bringing a traditional touch to new builds.

The knob is sprung, which means you don't need to rely on the latch's spring for its movement. We've opted for a light spring, so it takes very little effort to turn.

There's also no danger of it coming away in your hand – we've engineered the backplate and knob to be inseparable.

Antique brass is what's called a 'living' finish because it reacts to the air and moisture around it, causing it to darken (especially in the areas you touch most). We've given it a head start by ageing it by hand, so it has that antique look right out the box.

CORSTON

ARCHITECTURAL DETAIL

- Made from solid brass
- 4mm backplate with screwless ‘front’ side
- Super smooth turn thanks to self-lubricating, high-tolerance bushings
- Longer handle neck for a comfortable grip
- Designed for use with tubular latches and locks, or mortice locks
- Engineered to fit all standard door thicknesses
- When retrofitting, you’ll need to use our door handle installation tool
- Suitable for interior and exterior doors
- Sold in a pair

Suitability : **Interior doors**

Min. thickness : **35mm**

Max. thickness: **50mm**

Spindle size : **8mm x 8mm**

Mechanism : **Sprung**

Installation Prep: **Requires a 30mm dia. x 8mm deep hole drilled into the door to accept the sprung mechanism**
