## Clayton Long Plate Sprung Door Handle

Bronze 12505

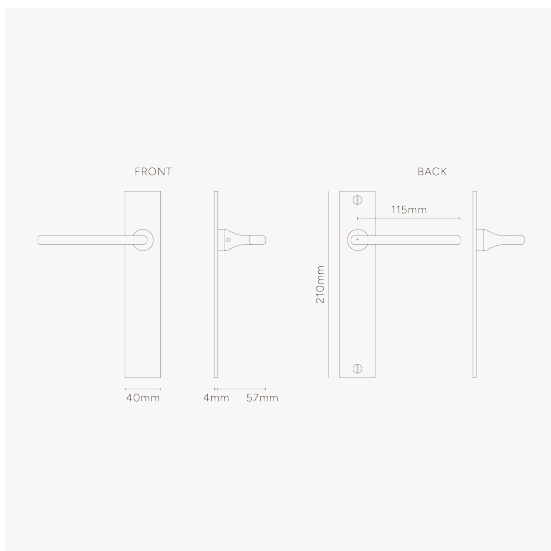

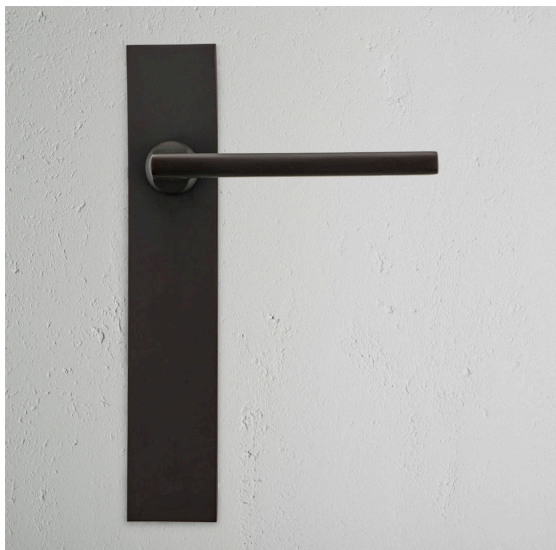

Clayton is probably our most modern door handle thanks to its sleek, flat-surfaced lever (the front-facing surface still has a subtle curve to it for a really pleasing overall feel).

This version includes a low-profile, long backplate for a bold look.

The handle comes with a sprung mechanism inside which is strong enough to take the weight of the solid brass and stop it sagging over time. It means you can pair it with any latch.

There's also no danger of it coming away in your hand – we've engineered the backplate and lever to be inseparable.

Bronze is our boldest finish, but it isn't shiny or bright, so it has a subtle side to it too. It's a deep matt brown colour that's almost black in some lights.
